

## Updated Stata version of IDEA

### **Country codes**

Correlates of War (COW) country codes are added to “source” and “target” states.

### **Goldstein’s cooperation-conflict scale**

1. The cooperation-conflict values are based on the list in King and Lowe (2003). Minor changes were made to wordings when necessary, also referring to the VRA’s event list (<http://vranet.com/IDEA.aspx>), because wordings are not always completely consistent between the database and King and Lowe (2003) (for example, “armed force” and “military” are used for the same event).
2. Events which do not receive a nonzero value (i.e., those which are considered as neither “cooperation” nor “conflict”) in King and Lowe (2003) are coded 0.
