BOOK MANUSCRIPT

Schuler, Paul. *The Illusion of Deliberation: Legislative and Electoral Politics in Communist Vietnam*.

This book asks whether single-party legislatures and elections contribute to improved governance? I argue that despite enthusiasm for the possibility of deliberation within single-party legislatures, the Vietnam National Assembly and its elections signal party dominance to the population and mobilize regime support. This book also casts doubt on hopes that single-party elections or legislatures will be the leading edge of democratization.
